

Lucernario

Care Instructions Lucernario Products

The **Lucernario daylight solutions** are designed with minimal maintenance requirements in mind. Nevertheless, some maintenance is necessary for long-term, optimal operation. **Techcomlight** markets these products and advises end users on correct use and maintenance.

General maintenance

Perform maintenance at least once a year, preferably in spring or after autumn.

Clean if necessary, for example in the case of visible soiling, dust accumulation or reduced light output.

Check the outside after heavy storms, hail or prolonged drought for any damage or dirt accumulation.

Safety first

Perform maintenance in dry weather to prevent slipping or damage.

Care instructions

- **Do not use abrasive cloths, brushes or aggressive cleaning agents** on any part
- **Wear gloves** to avoid fingerprints and grease stains
- **Remove loose dust** with compressed air or a dry microfibre cloth
- **Use a soft sponge or cloth with lukewarm water** to remove green deposits
- **Cleaning with a high-pressure cleaner is permitted**, provided you keep at a sufficient distance (min. 50 cm)
- **Check rubber seals and sealant seams** for cracks or aging.
